**7. What is the Islamic Base Rate (IBR)?**

The IBR is made up of two parts, our benchmark cost of funds (BCOF) and the Statutory Reserve Requirements (SRR) cost imposed by Bank Negara Malaysia. Our BCOF reflects the cost of funding for floating rate financing and mainly comprises of Customer Deposits and other floating rate funding raised by the Bank to fund these financing.

**8. What are the possible scenarios to trigger a change in the IBR?**

Our IBR can rise or fall due to changes in the BCOF and changes in the SRR. Changes in the BCOF could occur due to changes in the Overnight Policy Rate (OPR) as decided by the Monetary Policy Committee of Bank Negara Malaysia, as well as other factors such as changes in the cost of funds used to fund floating rate financing.

Example:

If the cost of customer deposit rises, the BCOF will rise as customer deposits is part of the components used to fund floating rate financing. The higher BCOF will trigger a rate increase in the IBR.
